Mark, Here's a rough example of how we incorporate a signature page into an ESD.

John

Subject: ROD ESD at Pendleton

Hi John, Pendleton is proposing an ESD for a groundwater ROD from 2014. There was active treatment for TCE and TCP in the ROD. The site also has 1,4-dioxane with concentrations below the 300 ug/l limit at the time but above the newer revised 35 ug/l.

They are now proposing active treatment for the 1,4 dioxane. I agree with the ESD. What is our approval process? There isn't a signature like in a ROD amendment, so do I send a concurrence letter at the Final stage or does it need to come from Angeles?
